

EARLY WARNING

HEAT DETECTION FIRE PREVENTION SYSTEM

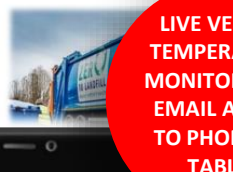

Within the UK alone, over 5000 commercial LGV fires on the highway were attended by the fire service, resulting in 84 casualties 2018.

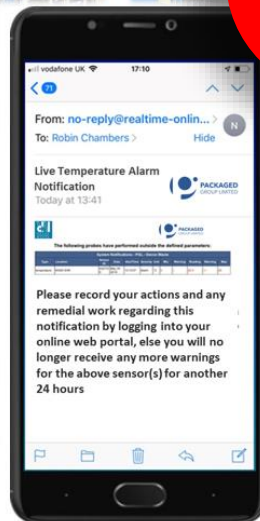

Managing a burning LGV can be a terrifying experience for even an experienced driver. Attempting to drive the vehicle off the highway as soon as possible, can often make the situation worse. Leading a burning vehicle into a garage forecourt, factory, shopping area or even a school!

Resulting costs can be significant, developing into hundreds of thousands of pounds for the operator as well as the emergency services attending the scene.

A SOLUTION TO THE CONSTANT THREAT OF VEHICLE FIRES

LIVE VEHICLE TEMPERATURE MONITORING & EMAIL ALERTS TO PHONE, PC TABLET
